

COVID-19 Indicator Trends-Woodbury County July 2, 2020 Update

Current Status: With the three-day holiday weekend upcoming, we anticipate the potential for a slight increase in the number of new confirmed cases in the next two weeks. We are currently averaging 10 new cases a day this week. Schools, colleges and universities are in the planning phases for what their educational delivery mode will be this fall, which includes the activities that are a part of this. There is also more serology testing becoming available. This tests for the presence of antibodies to COVID-19, which means you may have had the virus and recovered. See your provider if you are interested in receiving this test.

Percentage of Tests Positive

We are showing continued progress in this area; continuing to lower the percentage positive while maintaining a level of testing.

This data reflects the percentage of individuals tested by the date of the test, not the date results were received. Duplicate tests for an individual have been removed.

Newly Confirmed Cases

Newly confirmed cases are also on the decline, however, we continue to see new cases daily which indicates continued spread. Continued efforts on reducing this spread is necessary. Wearing masks when in public, staying home if you or a household member are not feeling well, social distancing, and washing/disinfecting hands regularly can help to reduce the spread.
