

COVID-19 Indicator Trends - Woodbury County 6/12/2020

Tyler Brock, Deputy Director, Director of Laboratory Services
Siouxland District Health Department

Percentage of Tests Positive:

This indicator shows a flattening of our trend, where we maintained at 12 percent positive test results for the week ending June 7. The preference would be to see a decrease, but this is at least maintaining a status quo. If you have been tracking the data, you may note that there has been an increase in the numbers shown for tests that were completed in the prior two weeks. This is the result of tracking them back to the date of the collection as opposed to the date the results were received, so data may be added that is more complete as it continues to come in. We are still seeing continued testing across our community.

Newly Confirmed Cases:

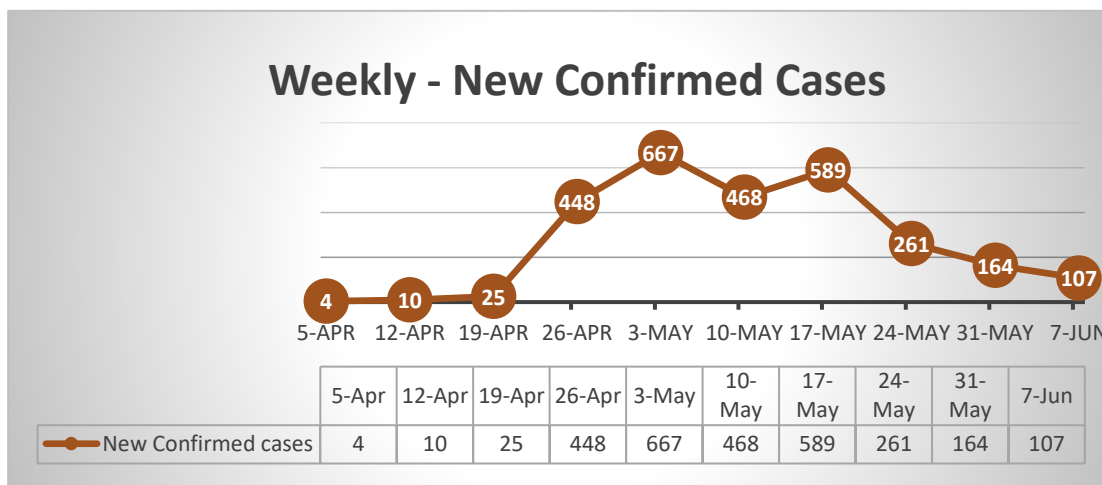

Our number of newly confirmed cases in a week is still going in the preferred direction and decreasing over time. We are hoping that this continues. The week ending June 7 would be the week that we may have begun to see the impact of reduced restrictions that occurred just before the Memorial Day weekend. We will continue to monitor this over the course of the summer, as we see further reductions in restrictions. Many venues and activities are also going to be opening in the next week that could have an

About Siouxland District Health Department

Siouxland District Health Department, the public health agency for Woodbury County, is creating "A healthy community for all" by "leading a collaborative effort to build a healthier community through improved access to health services, education and disease prevention." They provide public health nursing, nutrition, laboratory, health planning and environmental health services. For more information on Siouxland District Health Department visit www.siouxlanddistricthealth.org.

impact on these numbers. In this graph, the cases are shown in the week that the test was collected, and not the date the result was reported.

Even with these positive indicators, residents should continue to avoid large gatherings or groups, maintain a 6-foot social distance from others, practice good hand hygiene, and stay home if not feeling well.

Testing Rate in Woodbury County:

The following table shows the COVID-19 testing rates as of June 10, 2020 in the 20 most populous counties in Iowa, along with the state as a whole. Woodbury County continues to rank number one in the rate of testing out of these 20 counties, with 1 out of every 8 Woodbury County residents tested, compared to 1 out of every 15 residents in Iowa as a whole.

Iowa County COVID-19 Testing Rate Comparisons of the 20 Most Populous Iowa Counties

County	Population	Total Tested	Percent Tested
Woodbury	103,107	13,336	12.93
Marshall	39,369	4,528	11.50
Wapello	34,969	3,313	9.47
Black Hawk	131,228	11,288	8.60
